THE PROOF IS IN THE PERFORMANCE

Summer storms test the strength of your shingles. Which is why at Owens Corning, we put Duration® Series Shingles through rigorous lab testing to show how our shingle out perform competitive shingles with wide, single-layer nailing zones.

Thanks to our patented SureNail® technology providing Triple Layer Protection® in the nailing zone, Duration® shingles outperform competitors in 3 key tests*:

- Nail Pull-Through Resistance
- Nail Blow-Through Resistance
- Delamination Resistance

In the [Owens Corning Products](#) section of our Contractor Academy, you can see how Duration® shingles perform up to 2.5 times better in the Nail Pull-Through resistance test which simulates the wind force it takes to pull the shingles off the roof deck.

Innovative technology to help your roofs endure what nature dishes out. At Owens Corning, we know it's More Than Just a Roof™.
